PROFILE SUMMARY

Final year Computer Science student specializing in Software Development, AI/ML, and scalable application development. Experienced in building full-stack applications, REST APIs, intelligent systems, and data-driven solutions using Python, JavaScript, React.js, Node.js, SQL, and PyTorch. Passionate about solving real-world engineering problems and building reliable, scalable software.

EDUCATION

Indian Institute of Information Technology, Kottayam

2023 – 2027

B.Tech CSE with Specialization in Cyber Security

Kottayam, Kerala

Relevant Courseworks and Skills:

Data Science, Machine Learning, Deep Learning, Data Structures and Algorithms, Object-Oriented Programming (OOP), Database Management Systems, Operating Systems, Computer Networks, Cloud Computing.

PROJECTS

ChatInsight 🗒 | T5, PyTorch, HuggingFace Transformers, NLP, Seq2Seq, Deep Learning. **Sept - Oct 2025**

- Built a scalable text preprocessing pipeline for large conversational datasets using Python.
- Developed an abstractive summarization system using T5 Transformers and HuggingFace.
- Optimized training pipeline using HuggingFace Trainer API with AdamW optimizer.
- Evaluated model performance using ROUGE metrics and iterative experimentation.

SuggestBot 🗒 | Streamlit, SQLite, LangChain, Ollama(LLaMA2), Gemini API, RapidFuzz **Jan - Apr 2026**

- Developed an end-to-end Natural Language-to-SQL application using LangChain, SQLite, Gemini API, and LLaMA2.
- Built scalable backend logic for query generation and execution.
- Improved query accuracy to 92% through SQL validation and output correction..
- Reduced query failures by 40% using RapidFuzz..
- Designed an end-to-end NL → SQL → DB pipeline for real-time query execution and response generation.

Hopalong 🗒 | React.js, Node.js, PostgreSQL, Centrifuge, GeoApiFy, TypeScript

Jan - Apr 2025

- Built a full-stack ride-sharing platform with secure institute authentication using React.js.
- Designed RESTful APIs for ride matching, booking, and real-time messaging workflows.
- Implemented partial route matching, cost splitting, and ride history tracking features.
- Integrated real-time messaging via Centrifuge with end-to-end encryption.

TECHNICAL SKILLS

Languages: C, C++, Python, Java, JavaScript

Data Science: Pandas, NumPy, Matplotlib, Scikit-learn, Regex, Data Cleaning, Data Validation, Data Preprocessing, Feature Scaling, Statistics and Probability, Data Visualisation, BeautifulSoup and Scrapy

Machine Learning: Linear Regression, Logistic Regression, Neural Networks, Decision Trees, Clustering, Anomaly Detection, Recommended Systems, Reinforcement Learning, PyTorch, HuggingFace, Transformers.

Frontend: React.js, TypeScript, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js, REST APIs, API Design, JWT Authentication

Databases: PostgreSQL, MySQL, MongoDB, Supabase

Tools: AWS (EC2, S3, IAM, Lambda, RDS, VPC), Postman, Git/GitHub, SQLite, Excel, Linux, Figma

ACHIEVEMENT

- Solved 600+ DSA problems on platforms like Coding Ninja(114), LeetCode(229), and GFG(293).
- Secured Rank: 16 on GeeksforGeeks among students of my college.
- Earned IBM certification in Basics of Quantum Information.
- Completed 10-hour Cybersecurity training via Skill India (Tech Mahindra Foundation).
- Participated in a 5-day FDP on RNLP at IIIT Kottayam, actively engaging in discussions and problem-solving.
- Supervised Machine Learning: Regression and Classification – DeepLearning.AI & Stanford University (Coursera)
- (Lead:Nov 2025 - Present, SubLead:Oct 2024 - Nov 2025) PR Outreach for BetaLabs (Technical Club of IIIT Kottayam),coordinating with students,Sponsors, and stakeholders event participation and ensure smooth execution.
- (SubLead:Sept 2024 - Nov 2025) PR Event Management for WildBeats (Cultural Club of IIIT Kottayam). Managed event promotions, logistics, and student engagement, and improving overall event coordination.
